TERMS AND CONDITIONS OF SUPPLY

Unless a specific agreement is entered into, Horizon Energy Distribution Limited Standard Terms and Conditions of Connection are applicable. Copies of the Standard Terms and Conditions of Connection are available on request from our office or on Horizon Energy's website: www.horizonnetworks.nz.

TERMS AND CONDITIONS OF THIS APPLICATION

CONNECTION FEE

Unless otherwise noted, the Fee as stated will not vary unless the costs of the connection changes as a result of:

- Changes in the Applicant's; requirements or;
- Work performed which has not been included in the quote or;
- Submissions or objections from regional or national authorities, Roothing Authorities, Transpower, or Telecom, received after this quote has been prepared. Horizon Energy will take all due care to predict such requirements; and
- Where the price is indicated as an Estimate, it is subject to alteration based on the actual cost to undertake the works.

The Fee is the amount required to connect to the Horizon Energy Network System. The Fee is based on the cost of the supply and the Labour and Capital expenditure required by Horizon Energy to make available the requested service. This Fee is payable to Horizon Energy and excludes all costs for any private work that may also be required to facilitate the connection. Any contribution paid by the Applicant towards the cost of Horizon Energy equipment in no way infers ownership of such equipment. Additionally, where Horizon Energy incurs any costs in recovering amounts payable in terms of this application, those costs will be recoverable from the Applicant.

LINES CROSSING PRIVATE PROPERTY

If Horizon Energy owned equipment (overhead or underground) is to be installed on privately owned land;

- to which the customer has no legal right of use, an easement must be obtained,
- to which the customer has a legal right to use, an easement may be required.

Please Note

The Horizon Energy 'Easement Terms' are available at www.horizonnetworks.nz. Where an easement is required Horizon Energy will not live the connection until an easement is registered. Due to time required to process easements Horizon Energy has a 'Deed Granting Easement' that can be executed by the applicant immediately which will facilitate a quicker connection, Horizon Energy will discuss with the applicant, the procedures and forms that need to be completed. The procedure is also available at www.horizonenergy.net.nz under the 'Customers' tab.

Where an Applicant's service or distribution main (i.e. assets owned by the Applicant) crosses another landowner's property, the Applicant is responsible for obtaining a legal easement from the other landowner in favour of the Applicant. Horizon Energy is not responsible for maintaining, repairing or replacing service mains owned by the Applicant.

REQUIRED MAXIMUM DEMAND (KW) AND SERVICE CAPACITY REQUIRED (AMPS)

Horizon Energy undertakes to provide a supply to meet the Applicant's requirements of Maximum Demand and supply rating. The maximum demand is used for the calculation of the expected voltage that will be achieved at the point of supply. Horizon Energy will not accept any responsibility for a reduction in supply quality should load be drawn from the system in excess of this figure. The capacity of the supply fuse does not indicate the maximum capacity of the service and is only sized giving some consideration to discrimination between upstream and downstream protection devices.

Applicant to note:

- ALL information must be COMPLETED before the NC1 will be processed.
- Ensure that the form is lodged in sufficient time for the engineering design (if required) to be undertaken. In no case should less than 5 working days be allowed for the processing of the form.
